

The CBS Environmental Policy

CBS is a leading commercial interior fit-out & furniture specialist, based in Ascot, Berkshire.

In recognising the growing global concern for sustainable development, CBS is committed to reducing the environmental impact of its products, services and office locations as well as influencing our suppliers to improve their environmental performance.

Our Environmental "Journey"

The first step on the journey towards this goal was to have an Environmental Audit carried out. This gave us a comprehensive report on our position and will be a useful tool to measure our performance at various key points along the journey. We intend to regularly monitor our performance as we implement an approved Environmental Management System and work towards achieving ISO14001 accreditation.

Our key objectives include:

- Efficient use of water, energy & other resources
- Minimisation of office & warehouse waste and recycling what cannot be eliminated
- Reduction in mileage and fuel use for commercial transport and all other vehicles
- Use of recycled, non-damaging and/or ethically sourced products & consumables where possible
- Continual improvement and prevention of pollution
- Practicing corporate social responsibility by working with our local community

We aim to adhere to, and work beyond, current and anticipated environmental legislation & requirements and to ensure that all staff are educated and motivated to achieve this. We will listen and seek guidance from others as we proceed along our journey.

This policy is fully supported by all management and staff at CBS as well as many of the suppliers and contractors we work with and is available to view on our web-site www.cbs-plc.co.uk and intranet system.

A handwritten signature in black ink, appearing to read 'Phil Green', is written over a light blue rectangular background. The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Phil Green, Managing Director
