"CBS were successful in delivering the correct solution on time and within budget."

CBS recently completed the installation of one of their most inspiring furniture projects to date.

After initially being short-listed by the National Endowment for Science Technology & the Arts (NESTA), CBS helped develop the brief for their furniture requirement for 100 workstations on two floors at Plough Place in Holburn.

The chosen solution was a bench desking system, accessorised with sliding tops, tool rails, monitor arms, CPU cradles and power modules. The Unity workstations were complimented with versatile Smartstor mobile storage units and Hag seating.

All products were chosen for their strong emphasis on environmental sustainability, practicality and stylish looks. They work well together in creating a streamlined and effective office environment.

Facilities Manager, Paul Crayford said:

"CBS were successful in delivering the correct solution on time and within budget. This was due to their ability to listen and understand our detailed brief for the desired working style and future strategy."
