

At CBS the right relationship is everything

## Oracle Case Study

case studies

*"A very successful collaboration between client, designer and contractor"*

CBS were recently tasked with updating the atrium area and Customer Visit Centre for the Reading based Oracle Corporation.

The atrium area was transformed into a bright, colourful space more in keeping with a hotel lounge. Seating groups with sofas, tables & lamps give smaller, more intimate spaces and a new feature wall at the end of the atrium provides a backdrop for the stunning glass triptych. The area is no longer just a waiting room for visitors; it's now used by staff to sit and relax or for informal meetings.

The furnishing theme used in the atrium is continued in the CVC. A bespoke reception desk, eye-catching wave patterned glass panels illuminated with cold cathode lighting and stunning wave patterned wallpaper all serve as a backdrop to comfortable seating areas and a new business centre for visitors to use during breaks. More of the same finishes and beautiful glass triptychs along the corridors maintain a sense of continuity.

The project has been a very successful collaboration between client, designer and contractor and has been a most enjoyable and rewarding example of good teamwork.
