

*At CBS the right relationship is everything*

## Panasonic Europe Case Study

case studies

*"CBS designed and provided an excellent environment for our staff"*

CBS were recently invited by Panasonic UK to assist with the relocation of Panasonic Europe to vacant space within the UK headquarters in Bracknell.

The entire project was extremely complex; the design, fit-out, reconfiguration, external landscaping and staff relocation all needed to be achieved within an eight-week schedule.

One key area of the entire project was the impressive reception. The open and bright feel was achieved with a stunning bespoke desk, contemporary soft furnishings and feature flooring and ceilings accentuating the shape of the desk.

The exterior of the reception area was also enhanced with new landscape features including a granite entrance walkway and striking architectural foliage.

Other areas included a Boardroom, VIP meeting room, executive offices and a staff break-out area.

This very successful scheme was finished within budget, on time and ready for occupation.

Facilities Manager, Jason Plummer commented:

*"CBS designed and provided an excellent environment for our staff, operated quickly, met all of our deadlines and instilled confidence that we had made the right choice."*
