

At CBS the right relationship is everything

Stonebridge Case Study

cases studies

"Our offices and furniture were finished, ready for our occupation."

It's all about completing the project on time

CBS were instructed to provide a complete design and build service for Stonebridge's new offices in Central London, which covered four complete floors. CBS were also supplied new furniture throughout the offices.

Elements of the design included solid timber partitioning throughout, the creation of open plan areas, executive offices and meeting rooms, plus a staff breakout area.

Forty workstations in light oak veneer were selected from the Chablis range, along with associated screening, seating and storage.

"I would like to thank all of the team at CBS for the excellent work you recently completed at our new premises in London. With only a four week window in which to complete the project, we were at times concerned, but your team ensured that our offices and furniture were finished, ready for our occupation."

The new offices have been well received by staff and clients alike."

Gaëlle Meinguss,
Human Resources Manager,
Stonebridge International Insurance.
