"CBS ... maintaining a truly personal touch throughout the project."

A thoroughly professional service

TransMarket Group, London, are part of the TMG L.L.C. based in Chicago, USA, a private trading and investment company operating in the global financial markets.

As their demands for space expanded they secured a new area of 5500 sq ft which they required to be developed to meet the IT and communication needs of a busy European Financial HQ.

TMG sought a company to complete a full refurbishment including the installation of all services, and to provide a design for the interior and office layout. Out of a short list of 3 companies, CBS was chosen because of their professional approach and their broad range of capabilities, which gave TMG confidence that the project would be completed on time, to a high standard, and within the budget.

CBS were also able to assist TMG in dealing with the managing agents for the building, to produce the documentation required for the lease.

An office layout was required that would accommodate up to 50 trading positions with support staff, IT specialists, executive offices, a boardroom, breakout area and a reception. TMG also needed an extensive Comms room which was required to house all of the IT/telephony required to run the trading floor.

CBS put forward an interior design which included full height glazing to the front of all offices to provide a stunning working environment.

The trading room workstations were a crucial part of the project with a requirement to meet exacting IT specifications. CBS were responsible for the installation of all power and data communications infrastructure together with a powerful air-con system to cope with the massive Comms and computer facility.

At the end of the project, Jon Taylor, Managing Director of TMG said,

"CBS provided us with a thoroughly professional service during the period of our office relocation, from conception through to completion. Their skills and design work have enabled us to succeed in our vision to create a state of the art trading floor whilst maintaining a comfortable, luxurious working environment. The team at CBS demonstrated an honest, competitive approach to fulfilling our goals whilst maintaining a truly personal touch throughout the project."
